Summary

Jule is a Managing Associate in the Regulatory, Public Law & Competition team in Hamburg.

Her main areas of expertise are energy law, regulatory law, state aid law and litigation. She advises clients on a full range of issues concerning the regulation of the energy industry and contractual matters, with a focus on energy related issues.

Jule's work experience includes the representation of her clients before German and European courts as well as in arbitration procedures. She has many years of experience in advising the public sector. As seconded employee Jule advised the DB Energie GmbH and the BS Energy, Braunschweiger Versorgungs-AG & Co.KG.

Jule's clients include grid operators, energy supply companies, energy producers, energy intensive industries and the public sector.

Experience

- Advising Operators of pumped storage power plants in legal proceedings concerning the regulation of network charges
- Advising Energy supply companies on the contractual design of energy delivery and energy services
- Advising a transmission system operator on issues concerning the grid connection of a power plant
- Advising various energy intensive companies on the reduction of the EEG cost apportionment and the reduction of network charges; inter alia representation in proceedings of the European Commission and the European General Court
- Advising the Federal Ministry for Economic Affairs and Energy on energy efficiency issues
