OUR RENEWABLES PRACTICE

A market leading law firm in the renewable energy sector, Watson Farley & Williams has the range of experience and skills to complete renewable energy projects successfully. We advise our clients on all facets of renewable energy, from early stage development such as consortium issues and joint ventures to project financing, commercial contracts and acquisitions.

"INTERNATIONAL FIRM WITH A DEDICATED FOCUS ON RENEWABLE ENERGY PROJECTS, INCLUDING SOLAR, WIND, WASTE-TO-ENERGY AND HYDROPOWER PROJECTS."

CHAMBERS GLOBAL 2018

International network

From the firm's international offices, our lawyers operate as integrated teams, providing practical, commercially focussed advice on every aspect of this complex industry.

The firm has the benefit of being able to call upon over 100 lawyers with in-depth experience in renewable energy. This includes the experience offered by our environmental, regulatory, planning, public law, real estate and tax lawyers.

Broad focus

With experience in almost all types of renewable energy, our dedicated team have particular expertise in relation to:

- wind power – onshore and offshore;
- solar;
- biomass;
- waste to energy;
- storage/capacity;
- hydropower; and
- cleantech.

Working with our clients

With significant experience supporting a range of clients across the industry, our advice is grounded in a commercial understanding of how each element of the industry operates.

We work on pioneering and complex projects with financiers, specialist funds, institutional investors, developers, and operators of power plants, operators of electricity transmission and distribution facilities, operators of international utilities, major EPC contractors, power marketers, lenders, governments and international financial institutions. Our “cradle to grave” service includes:

- Planning and project development.
- Construction contracts.
- Commercial contracts including development and offtake contracts and subcontracts, project structures and risk analysis, service/operating contracts, security and lease structures.
- Risk identification/mitigation including insurance and financial products and weather derivatives.
- Consortium issues and joint ventures including corporate and tax structuring of ownership, asset purchase, know-how supply arrangements, risk and reward sharing and joint venture agreements/joint operating agreements.
- Mergers and acquisitions.
- Structuring and security arrangements for project financing, including project and secured finance, non-recourse lending and credit support and the use of specialist funds.
- Financing arrangements senior and junior debt, mezzanine, preferred equity and equity funding structures.
- Project bonds.
- Tax including ownership structures and tax-driven financing.
- Competition law, merger control, public procurement, State aid and other regulatory issues that may arise in renewable energy transactions.
- Dispute resolution, including commercial and finance litigation, arbitration, mediation and other alternative dispute resolution methods.
