WATSON FARLEY & WILLIAMS

HOW TO STRUCTURE AN LNG-TO-POWER PROJECT TO MITIGATE RISK

20 NOVEMBER 2020 • ARTICLE

London Partner Heike Trischmann and Nick Dingemans, a former partner in our Singapore office, have co-authored a feature article in LNG Shipping & Terminals, published by maritime and offshore specialists Riviera Maritime Media.

The article highlights both the exciting opportunities presented by the emerging LNG-to-power market and the inherent challenges that bring about risk to those involved in the process. Heike and Nick offer potential solutions to mitigating this risk throughout these complex projects. To read the article in full, please click **here**.

Riviera Maritime Media specialises in the maritime & offshore industries, publishing information for many specialised areas, holding related conferences and seminars, and supplying shipping data.

This follows Heike and Nick's recent in-depth guide 'The Anatomy of an LNG-to-power Project' as well as WFW's ongoing webinar series which covers a wide range of topics related to LNG-to-power projects including this risk matrix, a detailed look at the expanding Vietnamese market, the construction and financing of power plants and FSRUs.

On 19 November, Heike also spoke at LNG Shipping & Terminal's virtual conference 'LNG Ship/Shore Interface | Europe 2020' which included guest speakers from the LNG sector's leading organisations. This conference is a well-known platform for showcasing and discussing both the challenges and the solutions for LNG transfer and terminal development.

You can see all our LNG-to-Power content here.
