Biography:

Anthony is an Associate in the Public and Regulatory Law team.

Anthony's practice focuses on the energy sector and, in particular on renewable energy, as well as on related infrastructures (onshore and offshore wind, solar, biomass, biogas, hydrogen, electricity transmission networks, electricity interconnectors, etc.). He also advises on innovative projects such as electricity storage, electric mobility and on new electricity sale strategies such as corporate PPAs. He advises investors and operators on regulatory, public law and project contract aspects.

Prior to joining the firm, he notably worked for two years as a jurist in the legal department of the French national railway group (SNCF Mobilités and SNCF Réseau) during which he gained particular expertise in respect of public contracts and knowledge of the railway sector.

Anthony has a degree in public business law and is currently preparing an LLM in energy law at the Universities of Copenhagen (Denmark), Oslo (Norway), Aberdeen (UK) and Groningen (Netherlands).
