Biography:

Britta is a Managing Associate in the Energy group.

For more than 13 years, Britta has specialised in energy and energy trading law. She advises clients on all issues concerning the regulation of the energy industry and contractual matters, with a focus on energy related issues. Her expertise covers the contractual design of energy trading and energy delivery contracts, structuring of companies in the context of renewable energy levies and network fees, questions of network access as well as the entire context regarding e-mobility and network concession award procedures.

Further, Britta regularly advises on power plant projects, joint ventures and co-operations in the energy sector.

Her clients include energy trading companies, utilities, power plant operators as well as industrial companies including in particular energy intensive industrial companies, network operators and communities.
